

## *A Socialize Remotely Signature Event*

# *A Discussion of Cybersecurity with CS50's David J. Malan: Keeping Your Laptop and Phone Secure*

GORDON MCKAY PROFESSOR OF THE PRACTICE OF  
COMPUTER SCIENCE

In 2019, the most common password, by one measure, was 123456. And the fourth-most common password was ... password. (Are either of those yours??) Suffice it to say we can do better. Even so, there are trade-offs! Join us for a discussion of cybersecurity and learn how you can keep your laptop and phone (more) secure. Just how private are your emails and texts? What's "end-to-end encryption"? Is Zoom actually bad? And just what does incognito mode do? All this and more.

**Registration for this event will close at 3pm on Wednesday, May 20th.**

**Join us live online May 20 7-8 pm**

**Visit [SocializeRemotely.harvard.edu](https://SocializeRemotely.harvard.edu) to RSVP**

Presented by the Office of the Vice Provost for Advances in Learning  
[vpal.harvard.edu](https://vpal.harvard.edu)
